Software Engineer

Louisville, KY | (502) 777-7346 | tylerjohnson1015@gmail.com
github.com/tjohnson1015 | linkedin.com/in/tyler-johnson-a46631209

Software Development Skills

- JavaScript, Python, Node.js, React, Express, Redux, RESTful API, PostgreSQL, Sequelize, Bootstrap, Chakra, Flexbox, HTML, CSS

Education

DigitalCrafts | Certificate in Software Engineering | Atlanta, GA

April 2022 - August 2022

- Software engineering training program covering full-stack development including, but not limited to JavaScript, Python, including an emphasis on cutting-edge frameworks like React/Redux and server-side technologies including Node.js, Express, and PostgreSQL.

Software Development Portfolio

Sheltr | github.com/tjohnson1015/sheltr

May 2022

- Member of a 4 person team building a website that allows users to search for homeless shelters in their area along with information about the shelter and directions.
- Primary responsibilities included integration of Google Maps API for mapping shelters, city shelter data API for accessing information about individual homeless shelters, and UI design.
- Project was built with JavaScript, CSS Flexbox, HTML, and Bootstrap

Cinego | github.com/tjohnson1015/cinego

June 2022

- Member of a 3 person team building an online review service that allows users to create accounts, login, and review movies and tv shows that they've watched.
- Primary responsibilities included using Express to handle routes and templates, PostgreSQL for storing/accessing user account information, and integrating OMDB API for movie search capability.
- Full-stack application built with JavaScript, Node, Express, HTML, and CSS.

Truck Tracker | github.com/tjohnson1015/truck-tracker

July 2022

- Built a web application that allows users to create an account and search for food trucks in their area. Also allows for vendors to create an account, add details for their business, and create schedules so users know when and where to find them.
- All aspects of the application were handled by me. Responsibilities included using Express to handle routes, PostgreSQL for storing/accessing user and vendor account information, integrating Google Maps API and building the frontend with React and Chakra.
- Full-stack application built with React, JavaScript, Node, PostgreSQL, Express, Sequelize, Redux, and Chakra.

Work Experience

Diorio's Pizza and Pub St. Matthews | FOH Manager, Bartender | Louisville, KY

May 2014 - Present
